

## On the Subject of Guess Who?

*So you're telling me, after making 100s of ridiculous module requests like a Vault, a Safe, a Sun, and a Moon... you're asking me to make Guess Who? Guess who's not making your mod? NOT ME! Because I made it into reality. Peace!*

The module consists of the following components: A rectangular display on the left, a button below the rectangular display, and 5 displays in a vertical formation on the right.

Your job is to use the information that will be given on the left display to figure out the name of the Guess Who character. The names of the Guess Who characters are all exactly 5 letters in length. If an incorrect name is guessed, a strike will be recorded and the module will reset.

You can initiate the module by pressing the **Recall** button. The display will then show the answers to 8 Guess Who questions which can only be answered with **“YES”** or **“NO.”** Use the color of each response to determine which question is being asked. The answers may not appear in the apparent order given below.

Color:	Question:	Answers:
Red	Is your character female?	128
Orange	Is your character smiling?	64
Yellow	Does your character have light skin?	32
Green	Does your character have glasses?	16
Blue	Does your character have green eyes?	8
Violet	Does your character have black hair?	4
Cyan	Does your character wear a hat?	2
Pink	Does your character have attached earlobes?	1

Take the value of the questions with **“YES”** as an answer and combine them. Once the value is calculated, submit the name in the value position in proper reading order using the displays on the right. The top left character of the table below has a value of 0.

AARON	ALBIN	ANDRE	AUDIE	AYDAN	BROCK	BILLY	BRENT
